Dear Sir:

In response to the Office Action mailed April 4, 2005, applicants submitted an Amendment and Response on April 20, 2005. In that Amendment, applicants indicated that a Supplemental Reissue Declaration would be submitted to overcome the remaining rejection under 35 USC § 251. That Declaration has now been signed by the inventor and is attached to this cover letter. In view of the changes made to the application in the Amendment and Response filed April 20, 2005 and in view of the submission of the attached Supplemental Reissue Declaration, applicants believe that all issues outstanding in this application have been eliminated. Accordingly, this application may now proceed to allowance.

It is believed that no fee is due; however, in the event a fee is required, please charge the fee to Deposit Account No. 13-3723.

Respectfully submitted,

May 23, 2005

First Named Inventor: BOWERS, JOHN L.

Application No.: 09/986346

Filed: November 8, 2001

Reissue of Patent No.: 5,687,767

Title: UNI-DIRECTIONAL FLUID VALVE

**SUPPLEMENTAL REISSUE APPLICATION**  
**DECLARATION AND POWER OF ATTORNEY BY THE INVENTOR**

As a below named inventor, I hereby declare that:

My residence, mailing address, and citizenship are stated below next to my name.

I believe I am the original, first, and sole inventor of the subject matter that is described and claimed in U.S. Patent 5,687,767, issued November 18, 1997, for which a reissue patent is sought on the invention entitled UNI-DIRECTIONAL FLUID VALVE, the specification of which:

- ☐ is attached hereto.
- ☒ was filed on November 8, 2001 as reissue application number 09/986,346 and was amended on November 8, 2001, July 22, 2002, July 31, 2002, October 16, 2003, December 6, 2004, and April 20, 2005. Reissue application number 09/986,346 is a continuation of reissue application number 09/442,082 (now U.S. Patent RE 37,974).

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I believe the original patent to be wholly or partly inoperative or invalid for the reasons

- ☐ by reason of a defective specification or drawing.
- ☒ by reason of the patentee claiming more or less than the patentee had the right to claim in the patent.
- ☐ by reason of other errors.

At least one error upon which reissue is based is described below:

In claims 1 and 10 by reciting that both "said root end of the cantilevered flexible flap and the respective sealing surface that contacts the cantilevered flexible flap at said root end have a fixed curvature in a direction transverse to said longitudinal axis", applicant believes that the claim is narrower than required by the details

Application No.: 09/986346

Case No.: 54135US011

description and the prior art since only the flap needs to have the transverse curvature to achieve the benefits of the invention.

All errors corrected in this reissue application arose without any deceptive intention on the part of the applicant.

I acknowledge the duty to disclose information that is material to patentability as defined in 37 CFR § 1.56.

I hereby claim foreign priority benefits under Title 35, United States Code § 119 (a)-(d) of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed:

I hereby claim the benefit under Title 35, United States Code § 119(e) of any United States provisional application(s) listed below:

Application No.	Filing Date

I hereby claim the benefit under Title 35, United States Code § 120 of any United States application(s) listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States application in the manner provided by the first paragraph of Title 35, United States Code § 112, I acknowledge the duty to disclose information which is material to patentability as defined in Title 37, Code of Federal Regulations § 1.56, which became available between the filing date of the prior application and the national or PCT international filing date of this application:
